About G31000:

The Global Institute for Risk Management Standards is the international education and certification body for risk management. It organization sets the standard for professionalism for the thousands of risk professionals worldwide. The C31000 designation is the only individual risk management certification designed, developed and verified by international experts knowledgeable in the ISO 31000 risk management standard, many of them, current or former members of the international ISO TC 262 committee or members of their respective, national mirror, risk management committees. This credential ensures employers that prospective candidates have a good knowledge and understanding of the ISO 31000 risk management standard.

The Global Institute organizes major industry events throughout the world. We offer corporate training programs and partnerships with public, private or community enterprises, associations, colleges, universities, groups or individuals. Like the ISO 31000 standard, our focus is not specific to any industry or sector.
